

Be-Ge 8754 is a static and robust driver seat build for busses and railway traffic. Due to its reliability and unique adjustment possibilities it is widely used and popular amongst professional drivers. One very appreciated feature is that the backrest cushion has generous possibilities for height adjustment, this gives optimal support for both back and lower back for drivers of all heights.

The wide range of accessories makes the seat possible to equip with air suspension and various types of turning and height adjustable bases to fit in most vehicles. Equipment like armrests, headrest, Be-Ge's famous "AirVent" and electrical heating, are some of the accessories that makes the seat adaptable to each individual. With a product from Be-Ge you will be in a well designed, quality drivers seat. Be-Ge stands for comfort and quality both technically and ergonomically.
